Proficient in **Web Analytics** and **Google Analytics**, with expertise in **Data-Driven Decision Making** and Audience Segmentation to optimize performance and enhance user engagement.

Problem-Solving

Strong analytical skills to identify issues and develop effective solutions.

Creativity

Ability to generate new ideas or approaches.

Teamwork

Strong collaborative skills, working well with others to achieve common objectives.

Optimization ability

Effective at improving software performance

PROJECTS

MultiMagix Video & Audio Converter

2024 - Present Nellore, India

https://github.com/Maiterns/MultiMagix-FrontEnd-Desktop.git

Built an advanced media conversion tool as part of an internship with Maigha Inc., integrating functionalities for a seamless user experience.

- User Experience Design:** Designed an intuitive UI/UX, making the application accessible to both beginners and advanced users.
- Core Functionalities:** Enabled video and audio conversion with features like trimming, resizing, and support for multiple formats, empowering users to edit files efficiently.
- Performance Optimization:** Enhanced the app's performance to process large files quickly, reducing latency and improving overall responsiveness.

Fees Management System

2023 - 2024 Nellore, India

https://github.com/asifshaik01/FeesManagementSystem.git

Fees Management System automates key processes such as payment approvals and status tracking, simplifying fee management for both students and administrators.

- I Designed and enhanced a user-friendly UI for an online Fee Management System, streamlining fee payments and improving accessibility.
- Approval Workflow:** Implemented a dynamic system for mentors to review and approve payments, enhancing transparency and efficiency.
- Student Categorization:** Created a filtering system to track and categorize students based on payment status, aiding administrative oversight.

Campus Connect(React-based Student Platform)

2024 - Present

Developed a web application to connect students and offer essential academic service.

- Implemented an **Attendance Tracker** that monitors attendance, identifies patterns, predicts risk, and helps students stay on track.
- We integrated a **Free Course** module providing access to technical language tutorials, aimed at enhancing student skills.
- Created a **Resource Hub** offering downloadable **PDFs** for course material from 1st year to final year.
